phonesploit pro : <https://github.com/AzeemIdrisi/PhoneSploit-Pro>

C2C : phonesploit

windows : Covenant

temporary account information

nmap -sC -sV 192.168.29.165

nmap : network mapper tool

-sC : default script

-sV : software version information

DNS resolution

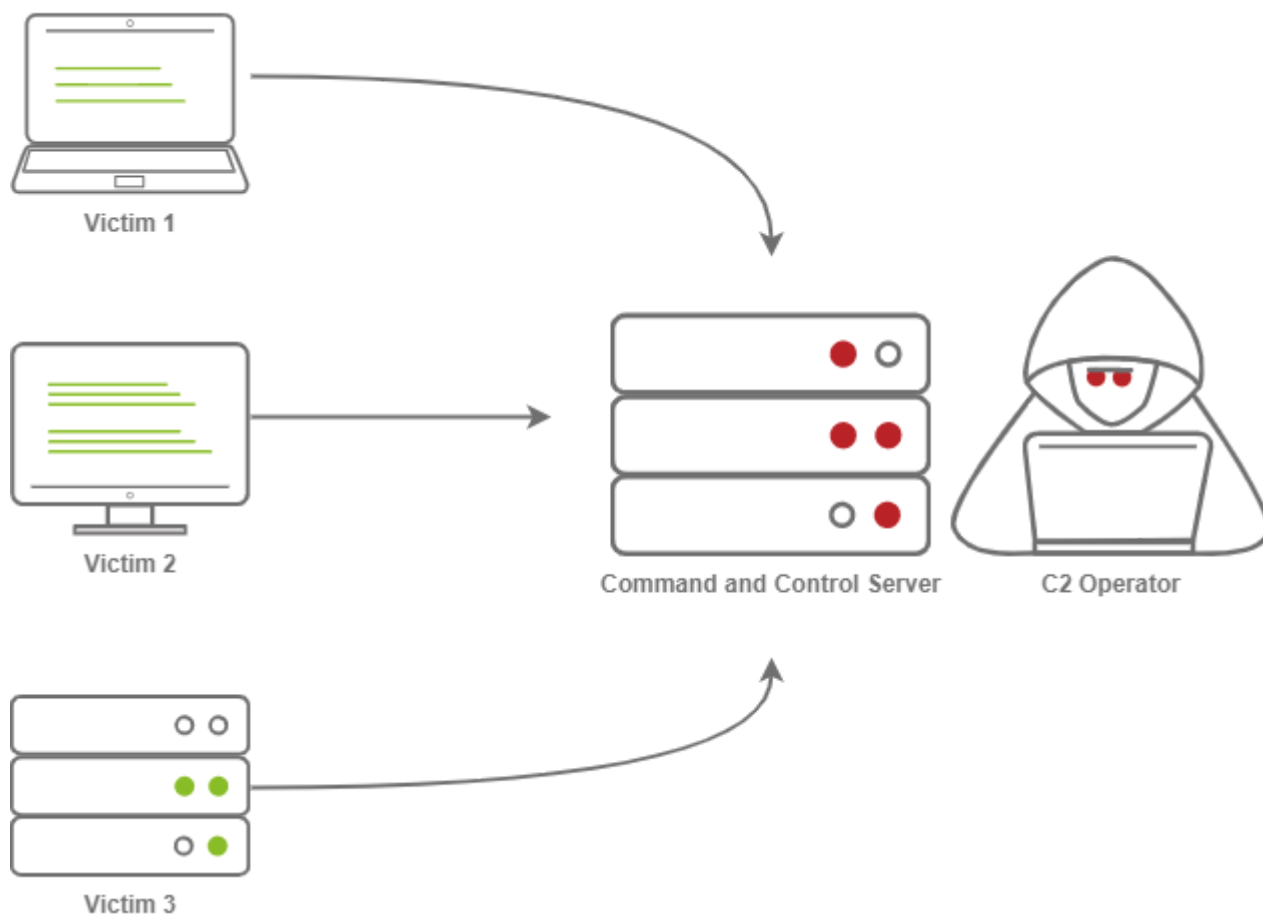

ping manipalhospitals.com : 44.231.138.183 : Forward lookup

nslookup 44.231.138.183 : manipalhospitals.com : reverse lookup

virtual host routing to be discussed

what is cloud environment to be discussed in detail

what is c2c :

command and control is a framework using which attackers maintain persistent control over the devices that have been hacked.

we will discuss more on this in next class.
